This report is designed to serve as a guide for those interested in researching the predisposition to disease in an astrological chart. Meant to gain a fairly quick general overview, it gives only short descriptions of the predominant influences.

IT IS INTENDED SOLELY FOR THE PURPOSE OF STUDY AND RESEARCH.

The tendencies or possibilities for illnesses mentioned DO NOT indicate that you are going to suffer from them. They merely are potential weak points and should only be used as a research tool to study the possible relevance of astrological theory to human health.

CONSULT A PHYSICIAN REGARDING ANY PHYSICAL PROBLEMS YOU MAY HAVE AND FOLLOW HIS/HER ADVICE AND TREATMENT!!!
ASTROLOGY SHOULD NEVER BE USED AS A SUBSTITUTE FOR PROFESSIONAL MEDICAL DIAGNOSIS AND TREATMENT!!!

INFLUENCE OF POSITIVE AND NEGATIVE SIGNS

Positive and Negative Balanced:

Your qualities are about equally divided between those of Yang and Yin which makes you less likely to overextend yourself in some areas or to neglect other areas of your life. You have a good understanding of the outside world, can be outgoing and active, but instinctively balance your activities with times of inner reflection and rest. A possible preponderance of one or more of the elements will be covered in the following paragraphs along with the affects it could have on health.

INFLUENCE OF ELEMENTS

Earth Dominant (Score of 6,8,7,3):

You are likely to have a cautious and reflective nature and rely more upon your senses and practical reason than upon intuitions or inspirations. Your temperament is more on the melancholic side with a lymphatic-nervous constitution. This influence could bring diseases that have to do with the condition of your blood, for instance a deficiency of red blood corpuscles, which is apt to lower your resistance. You also could be subject to digestive problems, constipation or diarrhea. Your appetite may fluctuate between ravenous hunger and little desire to eat and you could have headaches frequently, especially with a wrong diet.

This influence suggests hypochondriacal tendencies or hysteria. A poor diet and sedentary life could lead to vein problems and hemorrhoids. You could be susceptible to tonsillitis as well. Lack of exercise could be the cause of most of your illnesses and you should adopt the habit of stimulating your circulation regularly. More detailed information about your predominant sign or signs will be given in the following paragraphs.

INFLUENCE OF PREDOMINANT SIGNS

Taurus Dominant (Score of 0,5,3,2,3,2,0,1,3,1,4,0):

Taurus affects the neck, throat, tonsils and vocal cords as well as the third and fourth cervical vertebrae. There is a tendency to disorders of the thyroid gland, tonsillitis, laryngitis, pharyngitis, goiter, choking, nasal polyps and muscular pains in the neck. You probably will have to watch your diet constantly, as you may enjoy eating too much and losing the added pounds may be very difficult for you.

Primary reflexes to the reproductive system and rectum could bring on problems affecting the reproductive and eliminative organs. Secondary reflexes are to the heart and circulation and to the ankles and veins of the lower legs.

INFLUENCE OF ASCENDANT

If the Rising Sign was not already covered under Predominant, it will be described below. Potential health problems of this sign could be indicated, if several planetary aspects or midpoints are involved with it.

Aquarius Rising:

Aquarius affects the ankles, lower legs, blood circulation and the spine. It also rules the second and third lumbar vertebrae. There could be a tendency to ankle sprains or fractures, cramps in the calf muscles, phlebitis, varicose veins, swollen legs, spinal disorders and sclerosis of the spinal cord. You are inclined to be very active and should avoid any kind of excesses, as your illnesses tend to be brought on by nervous stress or exhaustion.

Primary reflexes to the heart and circulation could lead to palpitations, circulatory disorders, heart disease or heart problems in general. Secondary reflexes are to the neck and throat and to the reproductive organs and rectum.

INFLUENCE OF ASPECTS

Sun SemiSquare Moon:

The fluid metabolism in your body tends to be well balanced, strengthening your vitality in general. With other adverse aspects there could be potential fluid imbalances or problems with the eyes.

Unless other astrological influences indicate differently, you are likely to have a healthy gland- and hormone system.

Moon Conjunction Venus:

With other adverse aspects there could be a tendency to glandular or kidney problems and menstrual or hormonal disorders.

There is an inclination to insufficient secretion of the gland system, glandular atrophy, enlargement of glands, goiter and possible kidney ailments, phlebitis or female disorders.

Mars Conjunction Uranus:

Highly excitable, you are subject to sudden, unexpected stress and could be prone to sudden accidents or surgery. Muscle spasms or tearing of the muscles could also be possible.

Jupiter Square Neptune:

This aspect tends to bring a general lack of tone in the organs or atrophy. You also could be susceptible to swellings or tumors.

Asc. Opposition Mars:

You are inclined to be quite athletic, but may be prone to accidents or injuries and possible surgical operations.

Asc. Opposition Uranus:

You tend to be quite nervous and may be prone to stress-related ailments, spasms, cramps, high blood pressure, headaches, neuralgia or accidents.

MC Opposition Sun:

Unless other adverse aspects indicate differently, this aspect is not likely to bring any health problems.

MC SemiSquare Saturn:

You could be subject to illnesses brought on by emotional reactions. There is a tendency to mental afflictions and in combination with aspects from Neptune or Pluto in some cases possible malignancy.

MM Sesquiquadrate Moon:

Under adverse conditions a fluctuating fluid balance could be possible, bringing occasional swelling or edema.

INFLUENCE OF PLANET, NODE, ASC AND MC DEGREES:

The following correspondences may help to pinpoint some parts of the body that could be susceptible to disease. One should avoid concentrating on a single reference and remember to consider the cross reflex or organ that may be implicated. For example, under 1 ARIES you might select kidney, rather than the brain, the 6th rib or kneecap. This would apply especially, if in the previous analyses a tendency to kidney problems were repeatedly found. At times it is also possible that no degree correlation can be established.

INFLUENCE OF 6 HEALTH-RELATED MIDPOINT DEGREES

If the following midpoint degrees are involved in aspects to other planets, the effect is considerably intensified. Ideally, the reflex of the semisquares and sesquiquadrates to the degree points also should be checked and along with the other aspects, if any, may denote some correlations not readily apparent.

The MARS/SATURN midpoint is a major point of potential atrophy of the tissues or organs at the degree indicated. There could be injuries to the joints or tendons and inflammations of the muscles or bones.

Mars/Saturn affects:

Saturn/Uranus affects:

11 SCORPIO: Penis, labia majora. Primary reflex TAURUS: Third and fourth cervical nerves. Secondary reflexes - LEO: Clavicular (collarbone) vein. AQUARIUS: Right crural band.

The SATURN/NEPTUNE midpoint is a major point of potential chronic diseases or long-term ailments at the degree indicated. There is a tendency to degeneration and immune system deficiency.

Saturn/Neptune affects:

20 SAGITTARIUS: Right femoral head (thigh). Primary reflex GEMINI: Third rib. Secondary reflexes - VIRGO: Bile duct. PISCES: Right pronation muscles.
